

# *Junior Software Developer*

Are you looking for an innovative and dynamic workplace with a lot of responsibilities and development opportunities for your skills? Then this position is what you are looking for!

## **What will you do as Software Developer?**

You will contribute to the design and realization of new features for our applications. On a daily basis, you will intensively collaborate with professional information analysts, developers and test analysts in a (scrum) team of around 6 people. This team produces a new version of our application every 2 to 3 weeks, which our customers use for making sound financial decisions.

You want to learn about Software craftsmanship and how to transform this into good software. You are eager to develop a deeper understanding of a programming language and, like us, you follow relevant IT-trends. You regularly share your new insights with your colleagues in knowledge- and brainstorm sessions. All contributing to the innovation of our products!

## **What do you need to be our Software Developer?**

You have a Bachelor or Master degree in a technical, science or engineering field. You have a high affinity with ICT and are interested in the world of finance.

You also possess:

- good conceptual and innovative capabilities;
- good communication skills;
- ambition and a result oriented focus.

If you also have previous knowledge of and/ or experience with programming in an object-oriented programming language or relational databases this will be considered a distinct advantage!

## **What can you expect from Ortec Finance**

Our corporate culture is open and informal: we are always receptive to good ideas. After all, the most important goal is to truly help our clients. New employees will be given responsibilities immediately. You will have room to develop yourself, but will be personally and actively mentored in the process.

Our organization is not very hierarchical and rests on many independent, highly-educated employees who invest in their careers. Our company also spends substantial time and efforts to further train its people.

### *Our clients*

Ortec Finance helps clients to make better investment decisions. We support pension funds, sovereign wealth funds, insurers, banks, asset managers, financial planners and real estate managers across the globe. All our clients seek tools to help them make responsible decisions about wealth management, retirement planning or financial planning.

### *Committed to our clients*

In times of crisis we help our clients stay the course. This way the clients of our clients – the people holding pensions, mortgages and insurance policies – also profit from the solutions we have to offer. Our sophisticated models also enable our clients to clearly explain why they took certain decisions at a given moment.

As Ortec Finance we understand what is going on in the market and in the industry sector in which our clients operate. We translate this knowledge and understanding in very advanced models and in solutions that can always – we guarantee it – be implemented.

### *Career Opportunities*

Ortec Finance operates in dynamic markets that have great social relevance and impact. Because we deliver the high-quality solutions these markets demand, our organization evolves in the process.

This creates opportunities for our employees. We offer you plenty of room to fully apply your talents and highly value an enterprising spirit. At Ortec Finance you can transfer to other positions in different countries, or you can choose for a more specialized career. The possibilities are many.

### *Advanced learning environment*

Our employees are highly educated. Software developers and consultants carry great responsibilities: they must make sure that financial institutions function more efficiently and subsequently fulfill their social roles properly.

Right from the start you will get the chance to prove yourself in an organization that truly values bright, new ideas. We call upon your independent and enthusiastic attitude to quickly contribute to our operation.
