

# System and network administrator

**Employment type**  
Part-time (16h – 24h)

**Educational level**  
BEng / BSc (students)

**Experience**  
0 - 2 years (starter)

## Skills

Collaborator  
Excellent logical thinking capabilities  
Fluent in English (writing and verbally)  
Systematic and structured work approach

## Vacancy

You will design, implement, operate and improve AME's (future) IT infrastructure. While working in a demanding high-tech environment, you will support members of the organization using your knowledge on IT. You will be challenged to improve (parts of) the infrastructure in order to facilitate AME's continuous growth.

## Organization

AME offers a challenging career full of opportunities for personal and professional growth. In an atmosphere of passion for technology, ambition and responsibility, you will be part of a flat and dynamic organization focused on delivering tomorrow's electronic products from idea to realization.

Why join AME?

- Be part of a fast and continuously growing organization full of career opportunities
- Be part of an ambitious team
- Work with state-of-the-art production equipment
- Located in the center of technology of the Netherlands (Eindhoven)

## Profile

Preferably you have experience in the field of:

- Microsoft (SQL) Server
- VMware vSphere
- Networking (routing, firewalling)
- NetApp storage

## Offer

AME is a fast growing organization developing and manufacturing high quality products with electronics.

Our goal is to create innovative products for our customers that exceed market expectations by making use of state-of-the-art development facilities and a highly automated manufacturing environment.

Driven by technology, we strive for the best solution combining the disciplines of electrical, mechanical, software and industrial engineering.

Working at AME means joining a talented, ambitious and experienced team of experts, with a clear focus on personal and professional growth.

**AME is the ideal place to take your ideas and your passion for technology to the next level. Are you ready to join a team of world-class professionals?**
