

Are you interested in an innovative work environment with themes like Smart Industry, Industrial Internet of Things, and Industry 4.0? Take this chance to challenge yourself at Atos Professional Services.

We support our customers in their digital transformation. Smart Industry also called “Industry 4.0” is the next level for manufacturing and product development. There are many areas to explore within I4.0. Think about themes like Product Lifecycle Management (PLM), Manufacturing Execution Systems (MES), Manufacturing Operations Management Solutions (MOMS), (Industrial) Internet of Things (IoT), Augmented Reality (AR) and other (upcoming) new technologies and business services for industry.

We like to offer tailor made graduation assignments. Combining your interests and capabilities with our journey in the field of smart manufacturing lead to assignments that bring you and Atos to the next level.
